Value

The value of telephone service increases as more telephone subscribers are added. During the past two years alone, a rate gain of almost 200,000 telephones was made in the area served by Southern Bell. To make possible this unprecedented increase in telephone service has required an expenditure of nearly one hundred million dollars and 500,000 new employees, making a total of 28,000 men and women now employed by Southern Bell. To-day, as never before in history, the telephone is indispensable to business and industry, a source of ever present comfort, convenience and security to the home, and vital to our national welfare in war and peace. The telephone has become a part of our modern way of life—indispensable, invaluable.

PLANT NO ONIONS**IN A FLOWER POT**

We hear some of our good people have been taking the degree program a little too seriously. Of course, it is probably true a good many others are not taking it seriously enough. But there's a level-headed, common-sense middle ground. One of the first signs of over-enthusiasm came with the aluminum scrap collection. The purpose of the scrap collection was to put to use the waste metal which was lying around in garages, closets and attics, and not any good. But so enthusiastic were many house-holders that they brought new aluminum utensils and tossed them on the scrap heap. One man is reported to have contributed an artificial limb in good condition. Uncle Sam doesn't need that.

Life one of them to a surplus garden pool. Neither is so. There is a program to stimulate home gardening but let's keep it within reasonable bounds. Those with suitable backyards can grow vegetables for home consumption but Uncle Sam hasn't asked anyone to dig up his former beds or lawns. Apartment dwellers are under no pressure to grow onions in flower pots.

Just so with the dresses: No one wants a woman with two dresses in use to give one of them away—no, yes, anyhow. A woman with an extra dress or two in her closet that she never wears anymore but which are up his former beds or lawns, should put them to some use. It is all right to give them to a servant who needs them or to the welfare agency, distributing clothing to the needy. There should be an emergency surplus of clothing available in event of dire need. But there is nothing so urgent about all this that anyone need go around in the same dress every day in order to be patriotic.
